Art Unit: 2611

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-11, drawn to transmission of user-requested portions of multimedia data, classified in class 709, subclass 219.
 - II. Claims 12-41, drawn to transmission of user-requested media data based on recognition of ~~a to~~ different protocols, classified in class 709, subclass 230.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as one-time transmission of data irrespective of the protocol used. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Furthermore, because the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Moreover, because the inventions have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2611

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
